# Firefighter Response System

## Know who is responding - in real time

**Responding**
Know who's responding
instantly after dispatched

**On-Duty**
Know who's on duty at what
location and position/event

**Availability**
Know who's available
and who's not

**Mobile App**
View data and change status
from mobile web app

**Enotify Module**
Send phone calls, emails,
or SMS text messages

**Team Tracking**
Track each agency group or
team independently

**Mutual Aid**
View neighboring agencies
information

**Scheduling**
Member availability and
on-duty scheduling

**Reporting**
Track responses, on-duty &
availability, hours and more

**Used by thousands**
Providing value to thousands
everyday across the US

**Know who's responding - in real time**
Arriving members and personnel at the station instantly know
when to go en route with emergency apparatus

**Decrease your response times**
Don't unnecessarily wait at the station for members who are not responding.

**Respond with full crews**
Don't leave members behind because you didn't know they were responding

**Request additional resources faster**
Commanders in the field can request a second tap-out or mutual aid
within moments of being dispatched.

**Inexpensive, quick, and easy implementation**
No software to download and install, access web and mobile app
from computer and smartphones with internet access

**Increase your agencies efficiency**
Keep track of on-duty personnel, know member's availability before being
dispatched, send mass notification messages

**SWISSPHONE**
